TITLE OPINION

PREPARED FOR: Howe Sound Mining Company

ABSTRACT BY: Lemhi Title and Abstract Company, Salmon, Idaho

CONTINUED TO: August 23rd, 1951, 5 o'clock P. M.

PROPERTY DESCRIPTION:

The JAYCEE LODGE Mining Claim, situated in the Blackbird Mining District, location notice of which is recorded in Book 1 of Mining Claims at page 607, records of Lemhi County, Idaho.

The ARROW POINT FRACTION Lode Mining Claim, situated in the Blackbird Mining District, location notice of which is recorded in Book 3 of Mining Claims at page 1, records of Lemhi County, Idaho.

The HORSESHOE Lode Mining Claim, situated in the Blackbird Mining District, location notice of which is recorded in Book 3 of Mining Claims at page 1, records of Lemhi County, Idaho.

The OLD GOLD Lode Mining Claim, situated in the Blackbird Mining District, location notice of which is recorded in Book 3 of Mining Claims at page 2, records of Lemhi County, Idaho.

The QUEEN FRACTION, Lode Mining Claim, situated in the Blackbird Mining District, location notice of which is recorded in Book 2 of Mining Claims at page 62, records of Lemhi County, Idaho.

This is to certify that I have this 25th day of August, 1951, examined the above captioned abstract and make the following report on the title of the mining claims therein described:

That from the abstract it appears that possessory title is vested in Andrew W. Palo and Lucile Palo, his wife, presumably as community property, with the following exceptions, irregularities and reservations of title:

1. The above claims are unpatented lode mining claims and are possessory only subject to the paramount title of the United States of America.

2. That, in reviewing an abstract on unpatented mining property, the examiner is not able to learn from the record title whether or not the mining property is located over other unpatented mining claims held by others or whether unpatented mining claims had been filed upon the described property, the records being only kept and abstracted as to name only.

3. That it is impossible for an examiner to determine from the record whether or not a discovery was made, the corners properly placed upon the ground and remaining placed and the required location work completed, an engineer having to ascertain this upon the property.

4. That location corners are usually placed over and upon the next adjoining claim, which may be prior in right, thereby reducing the acreage of the claim.

5. That the discovery and location may have been placed upon prior located ground, which would make the location void from the beginning.

In conclusion I find that the location notices to the above claims were filed with the County Recorder of Lemhi County, Idaho, within the time required by law from date of discovery and record; that no mortgages or other liens exist against the property of record; no legal actions or adverse claims appear of record, as shown by the abstract, and no delinquent taxes exist as the abstracter states the property has not been taxed.

A copy of the deed from Andrew W. Palo and Lucile Palo, husband and wife, to Calera Mining Company, a corporation, was examined and I find the same in order. It is a warranty deed, warranting the title against everyone excepting United States of America and includes an additional paragraph therein, generally used in mining deeds, conveying the ore, dips, spurs, angles, and so forth. The consideration of the deed is TEN and NO/100 DOLLARS and other considerations and the grantors should place the proper Federal deed stamps upon the deed for the considerations given.

Respectfully submitted,

C. WALKER LYON
